

Subject: 19CSE456

Lab Session: 08

Notes:

1. Please read the assignment notes carefully and comply to the guidelines provided.
2. A report should be prepared for questions available in “Report Section” of this assignment & submitted to TurnItIn. Only one member of the team should upload the report to TurnItIn. The submission title should start with the team name / number.
3. The report should not have any content (text, figures, photos etc.) copied from any source outside your work. Please provide results obtained from your experiment to support your statements.
4. Any content retrieved from any external source (papers, blogs, websites, chat sites etc.) should be duly acknowledged.

Main Section (Mandatory):

A1. Continue your project work from last week’s exercise. Experiment with various regularization techniques and report your results with loss values, accuracies, precisions, recalls and F-scores.

Report Assignment:

1. Update your last week’s report with the results of regularization study. Fill all relevant sections for a paper. Pay special attention to interpretation of results and discuss your analysis. [4]
